Solid: smart lighting with an industrial aesthetic

Designed by Josep Lluís Xuclá, Solid is the reinterpretation for interiors of its original version for outdoor use. In this adaptation, the robust bar is presented in industrial-looking finishes and is equipped with a fully integrated light source, along with darklight optics for more efficient and comfortable lighting.

In addition to its minimalist and sleek design, Solid incorporates an innovative sensor-based control system, allowing for intuitive gesture-based lighting adjustment. This combination of industrial aesthetics, technology, and lighting comfort makes Solid a unique and highly versatile luminaire, ideal for both residential spaces and contract projects.

Solid is available in individual suspension, double suspension, and wall suspension versions. It also comes in three different sizes (800-1400 and 1900) and with three beam angles (30°-40°-60°).

Solid is part of the latest decorative lighting collections that B.lux will present at the Salone del Mobile - EuroLuce 2025. B.lux is a Basque company dedicated to the manufacture of contemporary design luminaires since 1979.
