Solid Outdoor: collection of outdoor luminaires with minimalist design and unique visual impact

Solid Outdoor is a new collection of outdoor luminaires designed by Josep Lluís Xuclá. Its slender tubular design in the form of a bar integrates a light source designed to remain visually discreet during the day, helping it blend into the environment. At night, the luminaire stands out with an impressive darklight effect, lighting the space in a unique way.

Solid Outdoor is available as a 54-centimeter angled bollard, as a vertical post, angled post, and in suspension version. The latter three models are available in four different heights (100-150-200 and 250 centimeters).

The collection offers a wide range of options, from minimalist elements to pieces with an almost sculptural character, allowing it to adapt flexibly to different styles and outdoor spaces. Its versatility makes it the ideal choice for both residential and contract projects.

Solid Outdoor is part of the latest outdoor lighting collections that B.lux will present at the Salone del Mobile - EuroLuce 2025. B.lux is a Basque company dedicated to the manufacture of contemporary design luminaires since 1979.
