B.lux's team of designers now includes Brad Ascalon, creator of the Crosshatch lamp collection

The prestigious American designer Brad Ascalon joins the team of designers of the brand B.lux, with the design of the Crosshatch lamp collection. This new collection is available as wall, ceiling and suspension lamps.

Crosshatch is formed by a metal reticular structure available in three formats, which can be combined to create multiple configurations. Its light structure allows the creation of large volumes, without overloading the space. In fact, its main appeal are the different spaces and lights generated wherever it is installed.

As a light source, it uses a LED light with a phase-cut dimmer, which is located in an opal white glass diffuser with a 15 cm diameter. The system guarantees optimal visual comfort, as well as glare-free lighting.

Crosshatch is part of the new collection of lighting systems introduced by B.lux at the 2022 Hábitat Valencia Trade Fair (FHV22). B.lux has been manufacturing and marketing lamps with a contemporary design from the Basque Country (Spain) since 1979. www.grupoblux.com
