Ring, the new ring-shaped lamp designed by Ilmio Design for B.lux

Ring, the new decorative lamp collection, has been launched thanks to the first collaboration between B.lux and the multidisciplinary studio Ilmio Design. As its name suggests, it is characterized by its ring-shaped design and the lightness of its shapes.

The whole lamp collection is based on a 25 cm ring that contains a LED light with a 15 cm glass diffuser, creating a space that gives the lamps a visually light look. The high diffusion capacity of the glass guarantees excellent light quality and greater visual comfort.

Ring is available in different finishes, including white, black and brass. It is also available in different models, such as table, floor, wall, single-unit suspension and multiple-unit suspension lamps. Thanks to the different models and sizes available, the collection can be used in both residential and shared spaces.

Ring is part of the new decorative lamp collection introduced by B.lux at the 2022 Hábitat Valencia Trade Fair (FHV22). B.lux has been manufacturing and marketing lamps with a contemporary design from the Basque Country (Spain) since 1979. www.grupoblux.com
