Beira, subtlety and lightness in a timeless luminaire

Beira, designed by Josep Lluís Xuclà, is a new lighting collection from B.lux that plays with the transparency and delicacy of glass to create an airy and ethereal visual effect. With a combination of different glass diameters and fine floating elements, Beira appears to hover in midair, evoking a sense of weightlessness.

Beyond its refined aesthetics, Beira is designed to provide warm, enveloping light. Softly diffused through the glass, it creates a cozy and inviting atmosphere while preventing glare and ensuring optimal visual comfort. The Beira collection includes a table lamp (Beira T) and two pendant lamps in different sizes: small (Beira S16) and large (Beira S45).

Its light and well-balanced design makes it a versatile piece that blends seamlessly into both contemporary and classic spaces, making Beira an adaptable luminaire suitable for a wide range of projects.

Beira is part of the new decorative lighting collections that B.lux will present at the Salone del Mobile - Euroluce 2025. B.lux is a Basque company specializing in contemporary lighting design since 1979.
